SECOND ANNUAL FRONTIERS IN GENOMICS LECTURE 2014

Consequences of Early Life
Microbiome Perturbations on Metabolic
and Immunologic Development

Martin J. Blaser, M.D.

George and Muriel Singer Professor of Medicine
Professor of Microbiology
Director, Human Microbiome Program
New York University Langone Medical Center

PRESENTATION

Increasing evidence suggest an early life microbiome with long-conserved developmental functions. Over the past century, public health and medical activities have been disrupting these relationships. Using murine models, we show metabolic and immunologic consequences of such activities.

THURSDAY, MAY 15, 2014

UM BioPark, 801 W Baltimore St. 21201

Discover Auditorium

11 am - noon

Light refreshments following lecture

REGISTRATION

Please RSVP to igs-event@som.umaryland.edu to ensure a place. Questions? Please contact or call us at 410.706.6768, Parking is available in the BioPark Garage on 1 N. Poppleton St. & Balto. St., as well as on-street, metered parking on Baltimore St.
